

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of the Claims:**

Claims 1-11 (cancelled)

Claim 12 (new): A door leaf actuator comprising:

a system carrier having a first end and a second end;

a plurality of components mounted on the system carrier toward said first end;

and

a door closer mounted on the carrier toward said second end, said door closer having a drive axle which is located as close as possible to the second end.

Claim 13 (new): The door leaf actuator of claim 12 wherein said components comprise a power supply, a drive motor, a hydraulic block, and a pump.

Claim 14 (new): The door leaf actuator of claim 13 further comprising a switch block arranged between the door closer and the second end, said switch block having switches.

Claim 15 (new): The door leaf actuator of claim 13 wherein the power supply and the drive motor are arranged in this order from the first end toward the door closer, said hydraulic block and said pump being arranged between the drive motor and the door closer.

Claim 16 (new): The door leaf actuator of claim 15 wherein the pump is arranged between the hydraulic block and the door closer.

Claim 17 (new): The door leaf actuator of claim 15 wherein said drive motor is provided with a flange, said hydraulic block and said pump being fixed to said door closer by screws extending between said flange and said door closer.

Claim 18 (new): The door leaf actuator of claim 12 further comprising a control board fixed to said door closer opposite from said carrier.

Claim 19 (new): The door leaf actuator of claim 18 wherein said door closer comprises valves having adjusting screws, said control board having holes for accessing said adjusting screws.

Claim 20 (new): The door leaf actuator of claim 12 further comprising a cover hood which can be fixed to said carrier, said cover hood covering said door closer and said components but not covering the switches of the switch block.

Claim 21 (new): The door leaf actuator of claim 20 wherein said carrier comprises locking openings at said first end and retaining springs at said second end for fixing said cover hood to said system carrier.

Claim 22 (new): The door leaf actuator of claim 21 wherein said cover hood has locking pins which engage in said locking openings.
